

JGR Optics Introduces New DA164 CS Detector Adapter

Ottawa, Ontario, October 24th, 2018 – JGR Optics Inc. announced today the availability of the DA164 CS® Detector Adapter. The design allows for quick and accurate testing without the need to disconnect from the detector.

CS® is a Registered Trademark of Senko Advanced Components, Inc. 2018 ©

This adapter is compatible with any JGR Optical Meter that has an integrating sphere as a detector.

About JGR Optics Inc.

Since the introduction of the innovative, industry-leading, Backreflection Meter (BR5) and Multi-Output Backreflection Meter (MBR5), JGR has expanded their portfolio to include the widely used MS12001 Cable Assembly Test System, industry leading Benchtop (SX4) and Rackmount (SX8) Optical Switches, Optical Attenuators (OA5) and the Polarization Dependant Loss Meter (PDL5). Through recent development JGR now also offers an ultra-wide wavelength range Tunable Laser Source (TLS5), a complete Environmental Optical Test System (EOTS) and the Wideband Component Test System (WCS).

In addition to research, development, and production within the JGR facility in Ottawa, Canada, they operate an ISO 17025:2005 Accredited Laboratory for repair and NIST-traceable calibration services.
