

a santec company

## **JGR Optics is now a Santec company**

Ottawa, Ontario, November 1, 2021 – We are very excited to announce that JGR Optics is now part of the Santec family as a wholly owned subsidiary. JGR Optics will continue to operate under its own brand for the foreseeable future.

Santec Corporation is a leading manufacturer of advanced optical components, tunable lasers, optical test equipment and OCT systems. With a complimentary portfolio to JGR Optics, this acquisition will allow both companies to continue growing as we expand into new markets.

For existing JGR customers, very little will change. All contacts will remain the same. Meeting customer needs will always be of the utmost importance to us.
