

### KEY FEATURES

- Mandrel-free RL testing
- 4 Single-mode lasers built-in
- Available for single-mode and multimode
- EF compliant for multimode
- Bidirectional or unidirectional testing

### APPLICATIONS

- Passive optical components design and validation
- Patchcord and cable assembly certification
- Compliance testing

### COMPLIANCE

- Conforms to GR-326-CORE, GR-1435-CORE, GR-910-CORE, GR-1209-CORE, GR-2866-CORE, Verizon FOC

### IN THE SYSTEM

- RL1 Automated Return Loss Meter
- Dual SX1 Switches
- EOTS software

### Flexible Software

The free EOTS Environmental Optical test software simplifies your long-term compliance testing. Tests can easily be setup to monitor IL & RL variation on a real-time graph. Results can be exported for hassle-free compliance analysis.

### Self-calibration

The EOTS Environmental Test System does not need to be sent back to JGR for annual calibration. The self-calibration feature built inside the RL1 provides step-by-step instructions and generates a calibration report thereby minimizing down-time and assuring measurement reliability.

### Product Description

The EOTS Environmental Optical Test System provides a fully integrated solution for long-term testing of optical devices. At the core of the EOTS is an RL1 Automated Return Loss Meter for fast and accurate IL & RL measurements. The SX1 switches used in the EOTS have a repeatability of +/-0.005dB allowing for reliable long term measurements. With its capability to measure changes in Insertion Loss (IL) and mandrel-free Return Loss (RL) of up to 320 channels, the EOTS is the perfect solution to perform compliance testing of devices being stressed in environmental simulations.

### Customizable setup

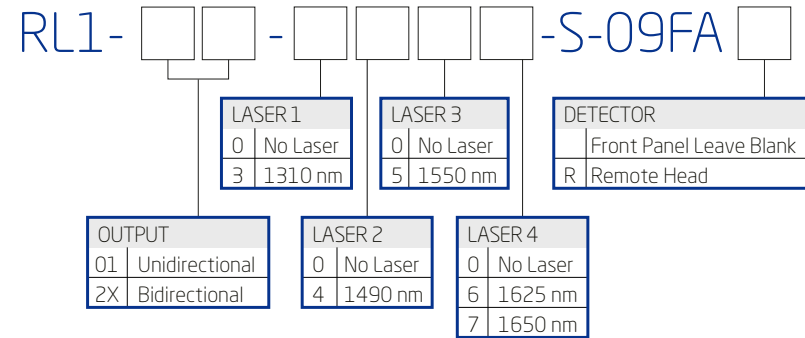

The graph. Results can be exported for hassle-free compliance analysis. The EOTS is made up of an RL1 Automated Return Loss Meter and dual SX1 switches, both of which can be rack mount or benchtop. If you prefer to have your equipment in a rack, or you prefer to have your equipment on a bench, we can help you optimize your setup stability and reliability.
