

The PTS software allows for automated control your JGR polarity testers through an easy to use dedicated Windows application.

### Compatible Products

**PT1** Polarity Tester

**PT5** Polarity Tester

**MS4** Polarity Tester

### KEY FEATURES

- Simple Pass/fail
- Auto detect polarities
- Export to Excel
- VFL mode

### APPLICATIONS

- Cable Assembly Testing
- Ribbon Fiber testing
- VFL troubleshooting

### REQUIREMENTS

- Windows 7/10

### Quick Traceable Testing

Manually confirming the polarity of cable assemblies is a very time consuming. The PT1 Polarity Tester can test 12 Channel assemblies in < 2 seconds. The instrument helps eliminate operator error regarding fiber configurations.

### VFL mode

Enable a specific fiber LED with a visible red light for quick visual troubleshooting.

### Auto Detect Polarity

Polarity Types A, B, C or D can be auto detected. Users can also auto detect custom configurations.

### Nearly Instant Results

- 12 Fibers: 1 second
- 24 Fibers: <1.5 seconds
- 48 Fibers: <2.0 seconds
- 144 Fibers: <5 seconds
- 288 Fibers: <10 seconds.
